

2. newsletter April 2024

Daily centre Zveza Sožitje has already started cooking in the project Science of cooking and here are the first results of our cooking process. Users of daily centre chose a recipe for tiramisu and bought the necessary ingredients in a nearby store.

We talked about **safe food preparation and preparation of suitable cooking space.**

We followed the tips from our upcoming Learning approach, the first result of the project, which is soon to be published and available for public and free to use.

At our creative cooking workshop we succeeded in making tiramisu of various shapes and flavors.

Science of cooking is a European project.
Project supports adults with intellectual disabilities
in learning more about STEM topics.

STEM topics are science, technology, engineering, math.
Our project uses cooking as a tool to learn about STEM
topics.

Learning about Science, Technology, Engineering, and Math
(STEM) through cooking can provide a lot of lifelong
learning opportunities.
